MAJOR ENGINEERING CONSTRUCTION

ABOUT MEC

ENGINEERING EXCELLENCE. BUILT ON TRUST.

Founded in 2015, **Major Engineering Construction** is a specialized engineering contractor delivering structural and mechanical erection services for industrial and infrastructure projects.

With a commitment to precision, safety, and timely execution, we have successfully completed projects of varying complexity, earning the trust of leading organizations across multiple industries.

Our core expertise includes Girder Launching, Pre-Engineered Building (PEB) Erection, Pipeline Fabrication & Erection, and Heavy Machinery Shifting. With the support of a skilled workforce, modern equipment, and strong project management, we ensure high-quality workmanship and reliable solutions that meet the highest industry standards.

Over the years, we have partnered with reputed clients such as Megha Engineering & Infrastructure Ltd. (MEIL), Royal Enfield, Kirby Building Systems, Grasim Paints, MRF, and other industrial leaders. These collaborations reflect our dedication to excellence and our ability to deliver results consistently.

At **Major Engineering Construction**, we believe every project is a foundation for lasting relationships. We continue to innovate, adapt, and improve, delivering engineering solutions that generate long-term value for our clients and communities.

A MESSAGE FROM THE DIRECTORS

Since our establishment in 2015, Major Engineering Construction (MEC) has been committed to delivering excellence in structural and mechanical erection services. Our journey has been built on a foundation of integrity, technical expertise, safety, and an unwavering dedication to quality. Every project we undertake reflects our commitment to precision, timely execution, and customer satisfaction. We are proud to have earned the trust of leading organizations across industrial and infrastructure sectors by consistently delivering reliable engineering solutions. As we continue to grow, our focus remains on innovation, operational excellence, and building long-term partnerships that create lasting value for our clients.

Mohammed Ashraf

Director

At MEC, we understand that successful erection work demands more than technical expertise—it requires disciplined execution, experienced professionals, modern equipment, and an unwavering commitment to safety. Our dedicated team works with precision and accountability to ensure every structure is erected efficiently, securely, and in accordance with the highest industry standards. We believe in building lasting relationships through transparency, integrity, and consistent performance. As we continue to grow, we remain committed to delivering innovative erection solutions that contribute to the success of our clients' industrial and infrastructure projects.

Mohammed Faisal

Director

*Thank you for placing your trust in us.
We look forward to serving you with excellence and distinction
for many years to come.*

BUILDING STRUCTURES. BUILDING TRUST.

SERVICES

At Major Engineering Construction, we offer a range of specialized services tailored to meet the diverse requirements of our clients. Our key services include:

01 GIRDER LAUNCHING

Girder launching is a critical component of bridge construction and other large-scale infrastructure projects. At Major Engineering Construction, we specialize in designing, building, and maintaining structures with small and large-scale. Using advanced hydraulic launching systems and expert engineering methodologies, we ensure seamless alignment and positioning of heavy girder structures. Our team comprises experienced engineers, project managers, and is committed to building under stringent project timelines, ensuring that every project is completed with structural integrity and operational excellence.

03 PIPELINE FABRICATION AND ELEVATION

Our pipeline fabrication and erection services cater to industries such as oil & gas, water distribution, and various types of oil & gas, including oil & gas, water, and installation of pipelines using high-grade materials like carbon steel and stainless steel to ensure long-lasting performance. Our state-of-the-art precision inspections to guarantee leak-proofing, and quality inspections to guarantee leak-proofing and efficient pipeline systems. With a dedicated team of skilled technicians and engineers, we ensure every project meets industry regulations and client expectations.

02 PRE-ENGINEERED BUILDING (PEB)

PEBs are revolutionizing the construction industry by offering cost-effective, durable, and versatile building solutions. At Major Engineering Construction, we specialize in design, building, and maintaining structures for both commercial and warehouse projects. Our expertise ensures optimized material usage, faster construction timelines, and enhanced structural integrity. With state-of-the-art engineering technology and best practices, we deliver customized PEB solutions that meet the highest standards of durability and functionality.

04 MACHINERY SHIFTING

Relocating heavy machinery requires meticulous planning and specialized handling to ensure smooth, safe, and sustainable construction. At Major Engineering Construction provides expert machinery shifting services using advanced lifting and transportation equipment, including hydraulic jacks, cranes, and heavy lifting machinery. These services include mining, transportation, and reinstallation of industrial machinery with minimal downtime and operational disruption. Our precision-driven approach ensures that every relocation is executed efficiently while maintaining the integrity and functionality of the equipment.

VISION & MISSION

Our Direction. Our Purpose. Our Commitment.

OUR VISION

At Major Engineering Construction (MEC), our vision is to become one of India's most trusted and respected structural and mechanical erection companies, known for delivering excellence in every project we undertake. We strive to be the preferred partner for industrial, infrastructure, and manufacturing projects by consistently providing safe, innovative, and high-quality erection solutions.

Through technical expertise, advanced equipment, and a highly skilled workforce, we aim to set new benchmarks in precision, efficiency, and reliability. By embracing continuous improvement, sustainable practices, and modern engineering techniques, we envision contributing to the nation's infrastructure growth while creating lasting value for our clients, employees, and communities.

OUR MISSION

At Major Engineering Construction (MEC), our mission is to deliver superior structural and mechanical erection services that meet the highest standards of safety, quality, and performance. We are committed to executing every project with precision, professionalism, and timely completion, regardless of its size or complexity. By leveraging experienced engineers, skilled technicians, modern machinery, and proven project management practices, we provide reliable solutions in girder launching, PEB erection, pipeline fabrication and erection, heavy machinery shifting, and other specialized engineering services.

We believe in building long-term relationships through integrity, accountability, transparent communication, and customer-focused service, while continuously enhancing our capabilities to exceed expectations and contribute to the success of every project entrusted to us.

OUR VALUES. OUR STRENGTH.

OUR PROJECTS

Delivering engineered solutions that build stronger industries and **lasting infrastructure.**

SRC JAMMALAMADUGU

Execution of bridge and infrastructure projects with an unwavering commitment to engineering excellence, precision, and structural integrity. We deliver reliable, high-performance solutions that strengthen critical infrastructure, connect communities, and support sustainable development.

NELLORE BACKWATER PROJECT

The Nellore Backwater Project involved the successful execution of specialized structural and mechanical erection works, delivered with a strong emphasis on engineering precision, safety, and quality. The scope included the erection, alignment, and installation of critical structural components, ensuring dimensional accuracy, structural stability, and compliance with project specifications. Executed using industry-standard practices and strict quality control measures, the project reflects our expertise in delivering complex infrastructure erection solutions with reliability, efficiency, and long-term structural integrity.

PROJECT: MEIL ,CHOORAL,INDORE

The MEIL Choral, Indore Bridge Project involved the execution of specialized bridge erection works, supporting the safe and precise installation of critical structural components. The project was carried out with a strong focus on engineering accuracy, structural stability, and adherence to stringent safety and quality standards. Through efficient planning, skilled execution, and the use of proven erection methodologies, the project contributed to the timely delivery of a durable bridge infrastructure, demonstrating our capability in handling complex bridge and heavy structural erection works.

OUR PROJECTS

Engineering solutions delivered with precision and commitment, building a stronger future through every structure.

APCO,VIDYANAGAR, GUDUR

The APCO Vidyanagar, Gudur Project involved the execution of structural erection works with a strong emphasis on precision, safety, and engineering excellence. Efficient planning and quality-focused execution ensured reliable structural performance and successful project delivery.

KRISHNAPATNAM PORT,NELLORE

The Krishnapatnam Port Project, Nellore involved the execution of specialized structural erection works to support critical port infrastructure. The project was carried out with a focus on engineering precision, safety, and quality, ensuring reliable structural performance and timely project execution.

MEIL,TEJANI NAGAR BALWADA

The MEIL Tejani Nagar–Balwada Bridge Project involved the execution of specialized bridge and structural erection works, supporting the installation and assembly of key bridge components with precision and efficiency. The project was completed using advanced erection techniques, strict safety protocols, and comprehensive quality control to ensure structural integrity and long-term performance. Our expertise in heavy structural erection, meticulous planning, and on-site execution contributed to the success.

KULUR BRIDGE,MANGALORE RE, KARNATAKA

The Kulur Bridge Project, Mangalore, Karnataka involved the execution of bridge erection works with a focus on precision, safety, and structural integrity. Through efficient planning and quality-driven execution, the project contributed to the successful delivery of a durable and reliable bridge infrastructure.

OUR PROJECTS

A showcase of our diverse engineering and infrastructure projects delivered with precision, quality, and commitment.

SAI GANESH

A customized PEB project for Sai Ganesh, designed to enhance operational efficiency with robust and modular architectural solutions for industrial applications.

GRASIM PAINTS, CHENNAI

A state-of-the-art PEB facility in Chennai, integrating advanced steel structuring techniques to support large-scale manufacturing operations.

MRF

A high-performance pre-engineered building (PEB) solution for MRF, focusing on structural stability, optimized utilization, and long-term durability.

ROYAL ENFIELD, CHEYYAR

A pre-engineered building (PEB) project executed with Kitly Building Systems for Royal Enfield's facility in Cheyyar. Delivered with a focus on durability, speed, and cost-efficiency.

VALUE SPACE – PEB

A sophisticated pre-engineered building (PEB) structure developed for Value Space. The project involved designing and erecting a high-quality filter for waste materials, with specific industrial and commercial requirements.
